Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8 and 16-23, drawn to an apparatus for converting message data into short message service fields for transmission via a short message service, classified in class 709, subclass 246.
 - II. Claims 9-15 and 24-29, drawn to an apparatus for receiving messages and determining whether the messages are of a short message service type, classified in class 709, subclass 230.
2. The inventions are distinct, each from the other because:

Invention I and II are sub-combinations capable of being used together but not requiring each other for utility. Invention I can transmit messages to any apparatus with receiving means including, but limited to, Invention II. Likewise, Invention II can receive messages from any apparatus with transmission means including, but not limited to, Invention I.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.
5. A telephone call was made to Darryl Mexic (Reg. No. 23,063) on 1/31/2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2142

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Douglas B Blair whose telephone number is 703-305-5267. The examiner can normally be reached on 8:30am-5pm Mon-Fri.
